Title: Around the clock : findings from the New Zealand time use survey 1998-99

Company: Statistics New Zealand; New Zealand. Ministry of Womens Affairs

Imprint: Wellington : Statistics New Zealand, 2001

Description: 91 p.

Format: Book

Abstract: This survey took place between July 1998 and June 1999 with a sample of about 8,500 people aged 12 and over. The survey records how people spend their days, providing information on **the amount of time spent on different activities such as paid work, voluntary community work**, household work, caring and leisure. The results are of general interest in their depiction of the way we organise our lives and the activities we participate in, but they also have more specific policy applications. In particular, the survey **provides valuable information about the amount of unpaid work that is undertaken and the contribution this makes to the economy and society**. The survey also identifies factors influencing participation in paid employment; the extent of participation in health-related activities, both in terms of caring for others and in maintaining one's own health; the use of time by recipients of income support; how much education and training is being undertaken and by whom; and participation by Maori people in various activities and how this differs from the rest of the population.

Subject (Primary): Voluntary workers

Subject: Charities

Social change

Working conditions

Abstract: Presents the results of a review of literature relating to the voluntary social service sector and focussing on volunteers and volunteering in medium-to-large social service organisations. Examines how the introduction of the 'contract culture' has influenced volunteering in voluntary organisations and other economic, demographic and social influences on volunteering. Identifies the changes that have occurred in the level (number) and nature (types of activities undertaken) of formal social service volunteering in the last two decades. Considers possible reasons for and potential consequences of any changes and the future role of volunteers within voluntary social service organisations.

Title: **The changing face of social service volunteering : a literature review**

Author: Wilson, Carla

Imprint: Wellington : Ministry of Social Development, 2001

Description: 71 p.

Format: Book

Abstract: The review focuses solely on volunteering that takes place within voluntary social service organisations. The main focus of the review is on changes over the past two decades since the widespread introduction of contracting for social services. The review also considers how a number of wider economic, demographic and social changes over the past 50 years (post World War II) have affected the level and nature of volunteering.

Subject: Women and employment

Abstract: Examines the different perceptions of the sameness and difference of socio-economic roles of men and women and how these shape social policy. Looks at issues raised by the gendered division of labour, including the Domestic Purposes Benefit (DPB), income and responsibility gaps, superannuation and **paid and unpaid work**. Identifies inherent contradictions and the resulting weaknesses in social policies that are built upon them.

Title: **Rural women's self-concepts and aspirations as members of selected voluntary organisations in New Zealand, Australia and Canada**

In: New Zealand Geographer, Oct 1996; 52(2):35-45

Journal Article

Author: Teather, Elizabeth K (University of New England, Dept of Geography and Planning, Armidale, Australia)

Abstract: Evidence from questionnaires completed by members of five rural women's organisations in 1994 and 1995 (3 traditional and 2 younger organisations) clarifies the motives women have, and the identities they assume, in joining these organisations. The older organisations attract women who wish to make a commitment to their community but newer organisations attract women who see themselves as farmers, or as employees and professionals in the agricultural industry. This represents a major shift in gender dimensions of rurality that has taken place during the last 20 years or so. Indicates a 'mobilisation' of rural and farm women who seek to participate fully - in their productive role and in the public sphere - in the attempt to

maintain the viability of family farms and rural communities. Discusses the role that organisations for men and women play in constituting the meaning of gender.
